KEY DELIVERABLES & TECHNICAL MILESTONES

- Complete dedicated neural cluster deployed with automated fault tolerance across 3 data centers.
- Sub-15ms P99 embedding search latency validated under 5,000 QPS load tests.
- Automated real-time guardrail system preventing prompt injection and data exfiltration.
- Full disaster recovery cold standby synchronized with 1-click failover capability.
- SOC-2 Type II compliance audit reports and continuous cryptographic audit logs.
